

PRESS RELEASE

SYS-DAT SELECTED TO JOIN THE INTERMONTE VALORE ITALIA INDEX

Milan, 2 July 2026 – **SYS-DAT S.p.A.**, a company listed on Euronext Milan, STAR segment (“**SYS-DAT Group**” or the “**Company**”) (**SYS.MI**), a successful Italian operator in the ICT sector that offers innovative IT services and solutions for the main industrial and service market segments, announces that it has been selected as one of the one hundred companies listed on Borsa Italiana that comprise the **Intermonte Valore Italia Index**. This index is dedicated to SMEs with a market capitalization of less than one billion euros that do not belong to the FTSE MIB.

The Index was created with the aim of highlighting the universe of listed Italian small and medium-sized enterprises, establishing a bridge between entrepreneurship, the capital market, and the national economic system. It represents a true cross-section of the best expertise within the Italian economy, helping to expand and diversify investment opportunities compared to traditional indices for both domestic and international investors.

Companies are selected based on rigorous technical and financial criteria designed to ensure adequate levels of liquidity, transparency, and investability. These criteria include: minimum free float, solid governance standards, analyst coverage, financial sustainability, debt levels, and overall representativeness within the Index itself.

The Index is part of **PMI2Change**, an innovative project by Banca Generali presented on July 1, 2026, at Palazzo Mezzanotte, home of Borsa Italiana. The project aims to support the growth and competitiveness of Italian entrepreneurs fostering the development of national listed SMEs. The initiative addresses the issue of limited liquidity and valuation of listed SMEs, helping to create the optimal conditions for a more efficient connection between capital and companies.

The initiative leverages the expertise of Intermonte-a leading Italian financial operator with over thirty years of experience in financial markets, particularly in SME research, sales & trading, market making, and investment banking-which has been an integral part of the Banca Generali Group since the beginning of 2025.

Based on the Index, Banca Generali, alongside Investlinx and Intermonte, has introduced a new actively managed, PIR-compliant ETF that will primarily invest in the universe defined by the Index itself. Banca Generali has committed to supporting the launch of the instrument with an initial target inflow of 100 million euros in the early months, with a gradual increase in exposure to reach 500 million euros over the medium term. Consequently, the initiative is estimated to help generate new investment flows of approximately 1-2 million euros per day, representing over 5% of the Index's free float.

Emanuele Angelidis, Vice Chairman of SYS-DAT Group, commented:

"Joining the Intermonte Valore Italia Index, supported by Banca Generali, is a testament to the strength and quality of our growth path, as well as a privilege that positions us within a virtuous ecosystem designed to enhance the valuation of Italian excellence. Being part of this index allows us to access significant new investment opportunities, driven by the capital flows that the new ETF will generate. This strengthens our dialogue with both the national and international financial communities, providing concrete support for our future development plans".
